

Aufgabe 2.3c

User:

The user is the main role, who can create groups and TodoLists, consisting of several different Tasks.

ToDoList:

A ToDoList is helping keep track of what tasks have to be done.

Task:

A task is part of a todo-list. The user has to complete the Tasks to finish the ToDoList.

Subtask:

Subtasks have to be finished, before the main Task can be marked as done. They can be used to split a big task into smaller ones.

Group:

A user can create their own groups. Inside the groups users can create Lists and work on tasks together.

ColourTyp:

Enum with a limited range of values, containing a couple of Colours. Used for the coloration of Tasks.

UserIDTyp:

A UserId makes the users unique.

GroupIDTyp:

A GroupID makes the Groups unique.
